3D colour

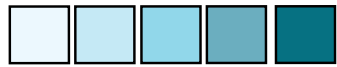

This simple illustrator's trick
will make your pictures look
three dimensional and
AMAZE YOUR FRIENDS!

Step 1

Start with any uncoloured picture...

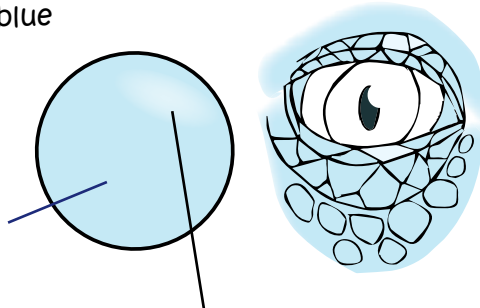

Step 2

Pick matching colours,
ranging from light to dark

...I picked shades of blue
but you can use any
colours as long as
they match

Step 3

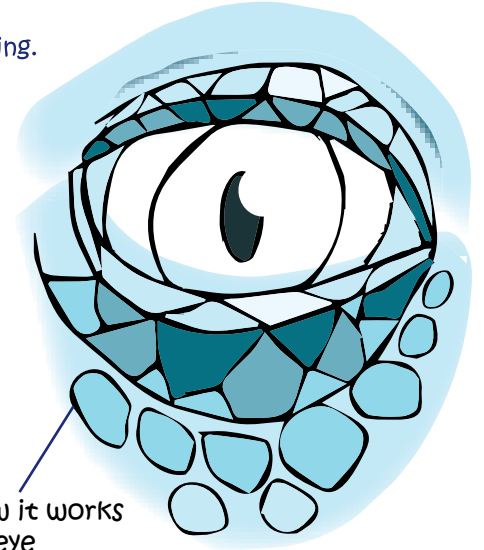

Colour the lightest
areas first...

Leave highlight areas without colour

Step 4

 Add the darker colours last

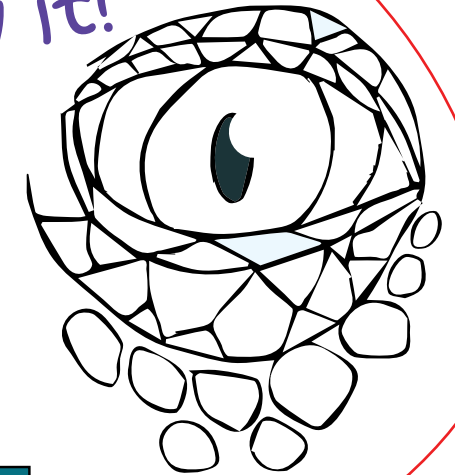

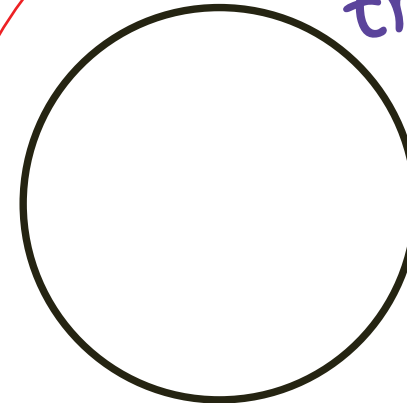

Highlights near the top
show where the light is reflecting.

See how it works
on the eye

Shading underneath
makes objects look
more solid

Now you
try it!
